BREATHER BAGS

Product Attributes

- Ultraclean Film™ certified to Level I cleanliness standards.
- Made of durable 3mil polypropylene with a heat sealed Tyvek® 1059B breathable strip.
- Sterilizable by steam, ethylene oxide and dry heat.
- Lightweight, pliable offering ease of transport and storage.

Applications

KNF CRP's Ultraclean Polypropylene Breather Bag is designed specifically for stopper and other component sterilization, requiring a clean environment. This advanced breather bag can be sterilized by autoclave, ethylene oxide or dry heat. Ideally suited for pharmaceutical and medical applications. A wide high temperature Tyvek breather strip never comes into contact with interior parts and allows for sterilized materials to maintain sterility for an extended period of time. Breather tubing is available offering the convenience of fabricating to size.
